"Everything for your backyard...and more"

“Why you will love our timber sheds”

Aaron's attractive, yet practical timber sheds offer more than just a storage area, they become a feature in your backyard. Our modular kit allows you to personalise your design and is fully relocatable.

We use environmentally friendly, non-arsenic based Tanalised® Ecowood™ treated pine. Our locally produced sheds have outstanding weather durability and are both moisture & termite resistant.

Our garden shed range does not exceed 10m², so you can order today without worrying about a building permit. Need something bigger? Then our workshop range is for you. Our workshops are engineered to meet the building code and we can organise your building permit for a hassle free purchase.

From a compact tool shed to an impressive workshop, Aaron's dedicated staff will help you design your ultimate shed to suit your space and budget.

Garden shed collection...

Standard features:

- Gable finish Colorbond® roof in a choice of cottage green or manor red.
- Moisture resistant timber roof fascias with decorative finials.
- Environmentally friendly non-arsenic based Tanalised® Ecowood™ treated pine cladding.
- 1.8m high walls with 90mm dressed pine framing.
- Structural timber door with steel frame and heavy duty lockable handle.
- Jarrah trimming on doors for that quality finish.
- Moisture resistant yellow tongue flooring with kiln dried treated pine joists.
- Built in modular form so you can personalise the design to suit your backyard.
- Galvanised screws and nails to prevent rusting.
- Supplied in kit form, your garden shed is relocatable.

Product Guarantee

We are confident that our products and service will not only meet but exceed your expectations. We also provide after sale support to ensure that any queries or issues that may arise will be dealt with immediately.

Garden shed range...

1.7m wide sheds

1.7m x 1.7m shed

The most attractive garden shed on the market is also the sturdiest with 90mm studs standard across our range. Ideal for an outside toilet, compact tool shed or somewhere to store your golf clubs and gardening equipment.

Use the solid 90mm studs to hang tools & shelving

RANGE INCLUDES *

1.7m x 1.7m
1.7m x 2.3m
1.7m x 2.8m
1.7m x 3.4m

*For external measurements allow extra length of 200mm.

2.3m wide sheds

2.3m x 2.8m shed

The 2.3m wide shed is a very popular size. The width of the 2.3m module gives you the versatility to place a single door and window in the one panel.

2.1m extra high walls & tinted skylight

RANGE INCLUDES *

2.3m x 1.7m
2.3m x 2.3m
2.3m x 2.8m
2.3m x 3.4m

*For external measurements allow extra length of 200mm.

2.8m wide sheds

2.8m x 3.4m shed with optional verandah

Our largest garden sheds, the 2.8m wide range is ideal for larger projects and storing your gear in a dry and secure place. A popular option is to add a verandah and turn your garden shed into a home office or studio.

2.8m x 3.4m shed with optional extras

RANGE INCLUDES *

2.8m x 1.7m
2.8m x 2.3m
2.8m x 2.8m
2.8m x 3.4m

*For external measurements allow extra length of 200mm.

Our Garden Sheds are made from Tanalised® Ecowood™ for long lasting protection against insect attack and decay, while leaving the wood attractive, clean and safe to touch. In today's increasingly aware world, Tanalised® Ecowood™ is a natural and environmentally responsible choice.

Garden shed optional extras...

Two coats of quality stain enriches the colour of the timber & seals it from the harsh Australian climate

Staining

Our tinted polycarbonate skylight allows extra natural light into your shed.

Skylight

Full Colorbond range available to match your house.

Alternative Roof Colour

Available in green or red, 600mm (h) x 835mm (w), sliding lockable aluminum windows are perfect on small sheds.

Small Window

Available in green or red, 900mm (h) x 1200mm (w), sliding lockable aluminum windows are perfect on large sheds.

Large Window

We can set your windows and doors in 100mm square dressed timber reveals for lining.

Window & Door Reveals

If you want to turn your garden shed into a studio, 2.1m high walls are recommended.

2.1m Extra High Walls

Stops any condensation from seeping through the walls and ideal for lining purposes.

Wall Sisolation

Reflective foil is fitted to the roof battens, keeping the heat out and reducing any condensation.

Roof Sisolation

Generous 2.1m high doors available for tall people who don't like to duck their heads!

2.1m High Door

Ideal for bulky items or high traffic garden sheds. Double doors come in 1.8m and 2.1m heights.

Double Doors

Turns your garden shed into a home studio and adds extra security. Brass lock set is standard.

Solid Doors

Ideal for unlevel sites and to increase air circulation underneath your shed.

Sub Floor

Custom built steps to suit any height sub floor design.

Steps

Gives your roof a neat finish and directs the flow of water.

Guttering

Our signature verandahs feature an overhanging roof, kiln dried treated pine posts and a generous deck.

Verandah

Yellow tongue shelving with steel brackets for solid support.

Shelving

We offer a professional and convenient delivery and installation service.

Delivery & Installation

Workshop collection...

3.4m wide workshops

3.4m x 4.6m workshop

3.4m x 4.0m workshop

RANGE INCLUDES *

3.4m x 3.4m	3.4m x 5.7m
3.4m x 4.0m	3.4m x 6.3m
3.4m x 4.6m	3.4m x 6.9m
3.4m x 5.1m	

*For external measurements allow extra length of 200mm.

The 3.4m wide workshop is a generous size for customers who need a bigger than normal timber shed. Ample width and space for any project or purpose you have in mind. The 3.4m workshop is often turned into a home office, studio or sleepout. Please note building permits are required and can be organised by Aaron's friendly staff.

4.6m wide workshops

4.6m x 4.6m workshop

Optional verandah and pickets

RANGE INCLUDES *

4.6m x 3.4m	4.6m x 5.7m
4.6m x 4.0m	4.6m x 6.3m
4.6m x 4.6m	4.6m x 6.9m
4.6m x 5.1m	

*For external measurements allow extra length of 200mm.

Sheds don't get any bigger & better than this. As long as you've got the space, the 4.6m wide workshop is ideal for a big workbench or storage area. Our modular design enables you to make your workshop as long as you would like. With the truss roof design, add extra high walls and reveals on the doors and windows and your workshop is ready to be converted into a 2.4m high flat ceiling studio.

Our Workshop collection is made from Tanalised® Ecowood™ for long lasting protection against insect attack and decay, while leaving the wood attractive, clean and safe to touch. In today's increasingly aware world, Tanalised® Ecowood™ is a natural and environmentally responsible choice.

Standard workshop features...

- Fully engineered design for building permit purposes.
- Gable finish Colorbond® roof in a choice of cottage green or manor red.
- Gutter kit complete with barge flashings and down pipes.
- 2.1m high walls with 90mm structural F5 studs.
- Steel bracing on both the walls and roof.
- 15° pitched gable roof with engineered roof trusses.
- 2.1m steel framed timber door with heavy duty lockable handle and jarrah trimming.
- Environmentally friendly non-arsenic based Tanalised® Ecowood™ treated pine cladding.
- Built in modular form, you can personalise the design of your workshop.
- Supplied in kit form, your workshop is fully relocatable.

Standard 2.1m high walls with steel bracing

Workshop installation process...

1. Stumps & Bearers

Stump holes are dug to the required depth. Then the kiln dried treated pine sub floor with 90mm x 90mm posts and 90mm x 45mm bearers and joists is professionally installed.

2. Flooring & Modular Walls

F5 structural pine is used on our framework supported by steel bracing. 2.1m is our standard stud height but you have the option of 2.4m high studs and sisolation as shown when lining your workshop with a flat ceiling.

3. Engineered Roof Trusses

With structurally engineered roof trusses, our workshops meet the building code. To line your workshop you can run ceiling batons underneath the trusses to hang a flat ceiling.

4. Roofing & Optional Verandah

Your standard workshop comes with roof battens, steel bracing and Colorbond® corrugated iron barge flashings and downpipes. For lining purposes, we recommend installing roof sisolation as it reduces heat and condensation.

What do you do next?

1. Design & Quote

Our trained staff will help you design your dream workshop and give a no obligation quote.

2. Site Inspection

We will come to your property and make sure the building fits, complete a site plan and meet all required criteria.

3. Your approval

After approved site inspection, we will finalise the price, design, site plan and require a 10% deposit.

4. Building Plans

The floor plans, site plans and elevations of your new workshop will be drawn up by our draftsman.

5. Building Permit

The plans will be put into the hands of our private surveyor who will issue you with a building permit.

6. Production

Once we receive the building permit, we require a 40% payment. Manufacturing will commence and an installation date will be set.

7. Installation

Your workshop will be delivered in modular form and erected by one of our professional installation teams.

8. Payment

A 40% payment is required on delivery of the workshop to the site. Upon completion the balance of 10% is payable.

9. Enjoyment

After an effortless Aaron's experience, you can enjoy the benefits of your new workshop.

Workshop optional extras...

Two coats of quality stain enriches the colour of the timber & seals it from the harsh Australian climate

Staining

Our tinted polycarbonate skylight allows extra natural light into your workshop.

Skylight

Full Colorbond range available to match your house.

Alternative Roof Colour

Available in green or red, 600mm (h) x 835mm (w), sliding lockable aluminum windows.

Small Window

Available in green or red, 900mm (h) x 1200mm (w), sliding lockable aluminum windows.

Large Window

Available in green or red, 1800mm (h) x 900mm (w), sliding lockable aluminum windows.

Extra Large Window

We can set your windows and doors in 100mm square dressed timber reveals for lining.

Window & Door Reveals

Reflective foil is fitted to the roof battens, keeping the heat out and reducing any condensation.

Roof Sisolation

Our Sub Floor/Floor consists of:

- 90 x 90mm stumps
- 90 x 45mm bearers
- Floor joists
- Yellow tongue flooring.

Sub Floor / Floor

2.4m High Walls are required for a Roller Door, and makes lining with a flat ceiling possible.

2.4m Extra High Walls

Stops any condensation from seeping through the walls and is ideal for lining.

Wall Sisolation

Our verandahs feature an overhanging roof, kiln dried treated pine posts and a generous 1.5m deep deck.

Verandah

Ideal for moving large items in and out of your dream workshop.

Double Doors

Turns your workshop into a home studio and adds extra security. Brass lock set is standard.

Solid Doors

An alternative to a standard workshop door, providing extra light and open living. 2.1m(h) x 1.8m (w)

Glass Sliding Door

Our roller doors are available in a full range of colours & provide your car and personal items extra security. 2.1m(h) x 2.5m(w)

Roller Door

Gives your workshop a "cute little cottage" appeal.

Handrails & Pickets

Built in kit form, you can install our workshops yourself or use our professional delivery and installation service.
